Artificial Intelligence Project Management

Each student must write a brief reflection file (Reflection_Week02_<YourName>.md) including:

1. What did I contribute this week?

I worked with my team to outline the project statement and create the project workflow. I also helped refine our ideas to make sure everything was clear and structured.

2. What did I learn about collaboration or planning?

I learned how important it is to stay organized, communicate well, and make clear decisions so the team can move forward smoothly.

3. What challenges did I face?

I found it a bit challenging to use new tools like GitHub and Miro, but I managed to learn the basics with some guidance.

4. What will I focus on next week?

I realized the importance of keeping alert, expressing myself well, and making proper decisions in order to keep the team coordinated and effective.
